Sterilization Rolls - 70 gsm - green film

Packaging

Sterile barrier ... be sure about it.

Today Infection control is getting increasingly important since more and more bacterias starts to get resistant to the latest anti-biotics. Infection Prevention is the key word. Sterilization packaging materials have been developed over many years to increase the stability of the sterile barrier over time.

Sterintech™ Sterilization rolls are used to wrap medical devices. The flexibility of length cutting is making a dedicated packaging of individual instruments possible and offer a number of advantages to the end-user
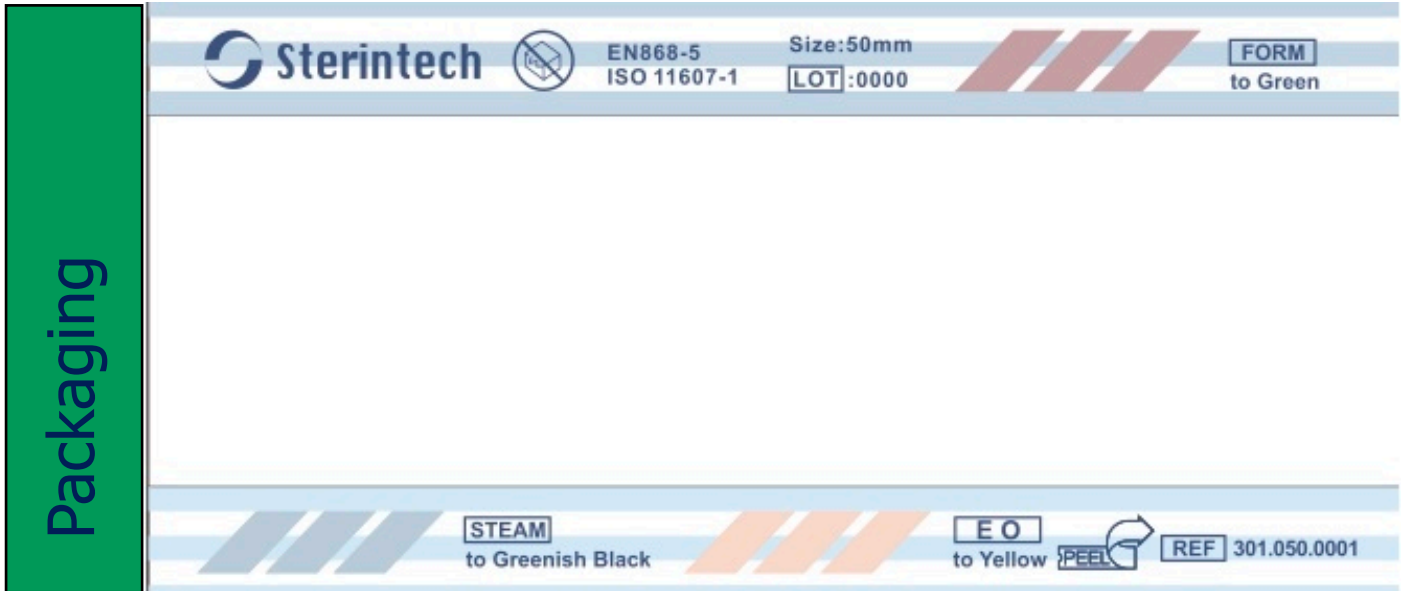

The Sterintech™ Sterilization rolls are characterized by the following:

✦ Easy recognition of content by the multi-layer transparent film
✦ Strong , multi-line seals
✦ Indicators and text printed outside the packing area
✦ Non-tearing film avoids tearing at opening the pack
✦ Clean and fibre-free opening of pack
✦ Compatible to STEAM, EO and FORM sterilization by three imprinted indicators
✦ Compliant to standard ISO 11607-1, EN 868 - 5 and ISO 11140-1

Please refer to the next side for all standard dimensions.
